

KVM CONCRETE BATCHING AND MIXING EQUIPMENT

The Best Mix

KVM is your best source of robust and high-performance equipment for concrete production.

More than 50 years experience in block and paver production secures optimal solutions for concrete products.

Water Control

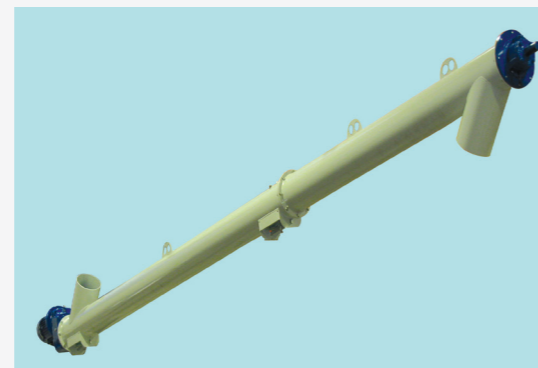

The unique digital microwave moisture measurement technique ensures accurate and reliable moisture data in the production.

Mixers

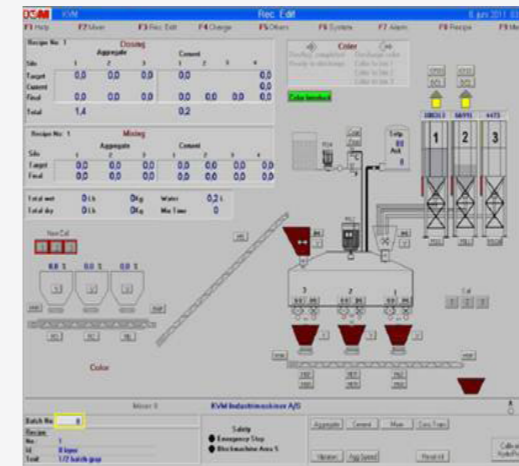

High performance planetary mixers up to 6000 litres. Mixers can be delivered with whirler for intensive mixing.

Screw Conveyor

Screw conveyors in all lengths and sizes. The screw conveyors can be made in two speeds or with a fine proportioning screw as well.

Control System

The KVM control system is the brain which ensures an effective production of quality products.

Simple user interface visualizes the process and secures productivity and reliability.

Belt

Belt conveyors of robust design. The conveyors can be made for all purposes for example weighing, proportioning and transport of materials.

Silo

Cement silos from 30 to 200 t.

KVM Concrete

We offer the best choice of equipment designed to your needs for the production of concrete products including:

- **Cement screws, silos and filters**
- **Planetary mixers in all sizes**
- **Aggregate storage**
- **Proportioning and weighing**
- **Belt conveyors**
- **Moisture measurement**
- **Control systems**
